

07022023 Comment from Indiska

We appreciate Fair Action's hard work and dedication to raise attention to the important matter of GBVH in the textile industry.

During 2022, we have been working intensively on reviewing our social and environmental responsibility work. As a result, we have targeted this as one of our focus areas in our coming sustainability strategy that we will prioritise going forward. This report has generated good discussions internally and given us an opportunity for self-reflection on how to improve.
